
International Conference on Research in Information and Communication Technology
Embedded Systems Track

NH-Koningshof Veldhoven, The Netherlands
November 18-19, 2010

This annual conference, organized by the Dutch Technology Foundation, consists of 4 tracks

- Signal Processing, Integrated Systems, and Circuits
- Microsystems, Materials, RF devices, and Sensors
- Security in ICT
- Embedded Systems and Software

The Embedded Systems track is the third IEEE Benelux Embedded Systems Chapter activity in 2010.

The informal ambiance of the conference is ideal for young Ph.D. Students and practitioners to present their ambitious work and early results.

There will be plenty of time to interact with colleagues. The majority of accepted submissions will be presented in the form of a flash presentation and a poster, whilst some will be invited to elaborate on their work in an oral presentation.

Call for abstracts

You are cordially invited to submit an abstract of at most 2 pages and 300 words. Indicate whether you want to have published, besides the abstract, a poster or a full paper. Submission implies the intention of at least one author to register, attend, and present the poster.

The abstract should contain Title, Author listing (names, address, phone, and e-mail address), key words (no more than five), and abstract body. The body should at least provide purpose (relevance, objective, possible applications), approaches and methods, and results.

Important dates

September 15	abstract submission deadline
September 30	notification of acceptance
October 15	deadline proceedings material

Invited Talks

Each track will include two invited speakers in the program

Please submit your abstract in PDF format to Ed F. Deprettere <edd@liacs.nl>
